

**GC/GCV, GS/GSV CARBURETOR
WARRANTY CHECK LIST**

Many clogged carburetors are not covered by the *Distributor's Limited Warranty* or the *Emissions Control System Warranty* because the clogging is usually the result of contaminated or deteriorated gasoline or dirt entering the carburetor venturi or float bowl.

Carburetor cleaning or replacement under warranty requires prior authorization. Before requesting authorization from Techline, you must verify the following:

Check for the following conditions	Verified
The gasoline in the fuel tank is fresh and not deteriorated.	<input type="checkbox"/>
There is no dirt or water present in the fuel tank.	<input type="checkbox"/>
The air cleaner is not severely clogged.	<input type="checkbox"/>
Dirt has not bypassed the air cleaner and entered the carburetor venturi.	<input type="checkbox"/>
The float chamber is completely clean and contains no foreign material, water, or signs of deteriorated gasoline or corrosion.	<input type="checkbox"/>
The carburetor has not been modified and the pilot screw cover is intact.	<input type="checkbox"/>
Confirm that the symptom did not begin after being stored for more than 30 days.	<input type="checkbox"/>
Honda Power Equipment VIN:	
General Purpose Engine VIN:	

Warranty authorization will only be considered after the above checks have been verified.

If approved by AHM, place a copy of this document with the hard copy of the repair order and warranty claim.

Notes:
