IN THIS ISSUE

01 Company Updates

02 Product Updates

Introduction

At Engine Power, there's always something happening—from industry events and facility improvements to updates from our valued partners. With so much going on, we wanted to create a simple way to share some of the highlights.

This newsletter is designed to give you a quick look at what's new across Engine Power and our network. While we can't fit everything into a single issue, we encourage you to follow us on social media for additional updates and stories throughout the year.

In this edition, we're recapping some of the events we've attended so far, sharing news about the recent consolidation of our Ohio and Wisconsin operations, and highlighting improvements made at several of our facilities. We're also passing along an important warranty update from our partners at Kubota.

We appreciate your continued partnership and hope you enjoy this first issue. We look forward to keeping you informed and sharing more Engine Power news in the months ahead.

01

Company Updates

Events We've Attended

World of Concrete & ConExpo

The Engine Power team had valuable opportunities to share ideas, strengthen partnerships, and discover new ways to support our customers' success. These events have been a success, and we're already looking forward to the next round of key events across the construction, public works, fire prevention, and forestry industries.

ProHealth Cancer Walk

We're very proud to be one of the many teams in supporting this year's ProHealth Cancer Walk. For more than 25 years, the event has helped provide care and resources to patients and families across Waukesha County, Wisconsin. Proceeds support vital initiatives including education, research, advanced technology, and patient care. We're proud to contribute to such an important cause and look forward to participating again next year.

Consolidation of Engine Assembly and Parts Fulfillment Operations

Engine Power is implementing changes to strengthen operational efficiency and expertise. Recent initiatives have focused on aligning processes, improving forecasting, increasing transparency, and standardizing engine builds for better availability and pricing.

We are consolidating two key areas of our business:

Engine Assembly will be completed at our Oconomowoc, Wisconsin facility

Kubota Parts Fulfillment will be managed from our Reynoldsburg, Ohio facility

Questions regarding these changes can be directed to your Account Manager.

Company Updates

Facility Updates

We're very excited to announce the new updates coming to both of our facilities. For Ohio, this means new training rooms for our monthly dealer certified technician classes. These six person classes alternate between both locations. The upgrades to the Ohio location mean that the classes are able to get even more in depth and hands on experience during their time with us. We're proud to offer these classes year round, and with specialized courses for spark ignited and mechanical diesel engines.

For the Wisconsin portion of this update, there is going to be much more focus on construction and reconfiguration. Many of the initial updates are going to be changes to our facility as a whole to optimize our workflow. While there will be some construction on high usage areas such as the loading dock and parking lot, we do not anticipate any change or slowing in productivity during that time. In fact we hope these updates will help streamline your experience with us overall.

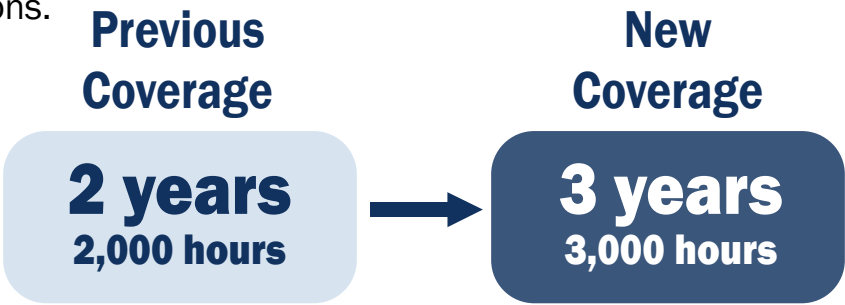

Remanufactured Parts

If you've been looking for dependable performance without the premium price, look no further than our dealer certified remanufactured parts! Every part is rigorously cleaned, tested, and backed by a one-year warranty from Kubota to ensure that you get the most out of the parts you order. Delivering the reliability you expect at a value you can appreciate.

Kubota Warranty Update

One of the biggest changes this year is the update to Kubota's standard engine warranty policy. As a company that already holds tremendous faith in the quality and longevity of their products, Kubota has extended their coverage to better support high-usage and more demanding applications.

The extension to the warranty is meant to help cover for any defects in the material or issues with workmanship while the machine is being used. In addition, it covers any service and repairs at authorized Kubota dealers during the stated period.

Questions?

Visit the Kubota website for details on eligible models, use cases, and exclusions. If you need further clarification, contact us directly - we're happy to help.
